How We Built It

1
Dream
Brainstormed our game idea as a team

→

2
Design
Designed characters, world, levels, sound, controls

→

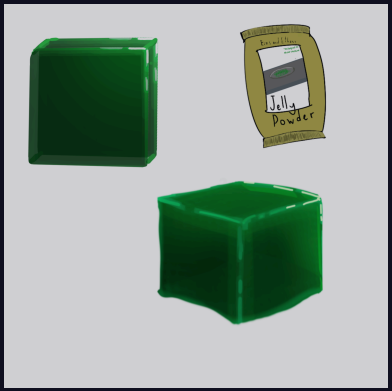
3
Build
AI coded the game from our designs

→

4
Test
Played the game and fixed bugs together

→

5
Ship
Exhibition day!



Our Tools

Python + Pygame - the programming language and game library
Raspberry Pi 5 - a small computer that runs our game
Claude (AI) - our engineering partner that wrote the code
Nintendo Pro Controller - how you play the game

By the Numbers

~13,000 lines of code - all generated from our design direction
15 floors to explore
5 boss fights
3 enemy types + projectiles and hazards
4 kids, **5** sessions, **1** game
